Internet Law Program

iLaw Torino 2005

Torino (Italy), May 25-27, 2005

Conference Hall

Fondazione Giovanni Agnelli

Via Giacosa, 38 - Torino (Italy)

OVERVIEW

The Berkman Center for Internet & Society at Harvard Law School first instituted the Internet Law Program - iLaw - in 2000.

Since then, it has always been an occasion for important debates ranging from intellectual property to the complex and controversial issues related to cyberspace regulation, giving the participants an opportunity to:

- consider the legal and policy environment that governs online activity, both in the U.S. and around the world;
- examine the changing technological character of the Internet;
- explore the implications of Internet policy and legal reforms;
- identify how reforms affect the public interest.

WHO SHOULD ATTEND AND WHY

The lectures will be of special interests for professionals belonging to many different areas: entrepreneurs, managers, technologists, lawyers, economists, public administrators, politicians, journalists, media scholars and non-profit operators.

No prior background in the subject of Internet Law is required.
